

Your adventure starts here

Read. Think. Move. Learn new words.

Explore four worlds in Word Crystal Quest. Read short clues in English. Choose the right thing or place. Run, jump, shoot and cut fruit boxes to find four bright crystals.

Open the game

1. Unzip the whole game folder. Keep all the files together.
2. Open index.html in your browser. On a laptop, you can play without the internet.
3. Choose Start adventure. Type your name and choose your picture.
4. Open the School map. Read Word help, then start the missions.

On a phone or classroom screen, turn the screen sideways. Some devices cannot open local HTML files. Use the web game if needed.

Four worlds. Four ways to play.

Use a keyboard, mouse or touch screen

World	Controls
School Sprint	A/D or left/right arrows move. W, Up, Space or Z jump. S ducks. Jump onto the platform with your answer.
Household Launch	Pull the ball back and let go. WASD moves your aim. Space, X or F shoots. Or press 1-3 to set your aim, then Shoot at my aim.
Neighborhood Rush	A human runner follows the road. A/D or left/right arrows change lanes. W/Shift runs faster. S slows down. Run into the gate with your answer.
Crystal Finale	Swipe or click the fruit box with your answer. Your explorer flies and cuts it. A/D chooses; Space, X or F cuts. You can press 1-3 too.

Keys in every world

In missions, 1-3 sets your aim or lane, or cuts a fruit box. In tests, 1-3 gives your answer. P or Esc pauses the game. Press again to continue. M turns sound on or off. Enter can act as the action key when a button is not selected.

Settings

Easy mode gives you slower moves and more time. Less background movement reduces moving backgrounds. You can change the volume or turn sound off. Use Full screen for a bigger view when your browser supports it.

On a touch screen

Use the arrow and action buttons. Your move gives your answer. You can hold a move button and the jump button at the same time. In the town, tap a lane to move there.

Lives, time & Game Over

Watch the hearts. Watch the clock.

Three lives

You start an area with 3 lives. A wrong answer, a collision with an obstacle, a missed shot, a wrong lane or time running out costs 1 life. At 0 lives, the game stops and shows GAME OVER.

Choose Try area again to start that area from mission 1 with 3 lives. Or choose Back to map. Your earned badges and finished tests stay saved. Leaving and returning to a run does not refill its lives.

A clock for each question

Mode	Mission time	Test question time
Normal	60 seconds	45 seconds
Easy	90 seconds	60 seconds

In a mission, read, answer and finish the move before the clock reaches 0. When time runs out, you lose 1 life. If lives remain, you can try that mission again with a new clock. Your first answer stays in the practice score.

In an area test, time running out counts as a wrong answer. Read the answer, then move to the next question. Tests use scores, not game lives.

Take a break

The clock stops while the game is paused, while you read a message, and when the game window is hidden. It continues when you return. A cut also stops the clock until the move ends. The answer is checked when the sword hits. Read the answer after each question.

Your scores & a fresh start

Keep learning. Try again. See your progress.

Practice and tests

Each world has 50 mission questions. A new run picks 12: four at each level. The next new run uses different questions. Continue a saved run to keep its questions. Each world also has a Final Challenge with 3 tasks and a test with 10 questions. Finish the challenge to open the test. The practice score uses your first answer without a hint. You can fix a wrong answer, but it does not change that first result.

Each correct test answer gives 10 points. Get 70 or more to open the next area and earn a badge. You can take the test again without playing all the missions again. Game points and missed moves do not change your test score.

Your best test result keeps your badge. Your latest result and earlier tries appear in Teacher results. Get four badges to download your certificate. The certificate uses the average of your four best scores. It is a game award, not an official English qualification.

Reset Progress

On the map, choose Reset Progress. Read the message, then choose Yes, reset my progress. This clears the current player's scores, badges, stars, word cards, styles, tests and saved missions. Their name and picture stay. Other players keep their progress. This cannot be undone.

Secret code for testing

Choose SECRET CODE on the home screen or map. Enter SURYO AGUNG and press Enter. All maps open. This does not give you scores or badges. Choose TEST MODE ON, then Turn off test mode to use the usual map rules. Reset Progress also turns test mode off.

Progress stays on this browser and device. Download a results CSV to keep a copy. Clearing browser data may remove your progress.

Words, stars & a living world

Your learning makes a difference

Bring back the light

Every finished mission helps your world. After 4 missions, the lights come on. After 8, the garden grows. After 12, the world is full of life. Your progress stays on the map when you return.

Help a friend: Final Challenge

Each area ends with 3 linked tasks. Get ready for Art, make lunch, do two jobs in town, or set up a study space. Use the same jump, shoot, run or cut controls. The challenge starts with 3 lives. Finish it to open the area test.

My Word Book

Your answers build a book of words and useful phrases. Each card has a picture or icon and a short example. Wrong answers go into Words to practise. Practice has no clock and uses no lives. Give 2 correct practice answers to clear a word. A wrong practice answer starts that word at 0 again.

Earn three stars in each area

Star 1: finish all 12 missions. Star 2: answer 12 different questions correctly on your first try, without hints. Star 3: finish the Final Challenge. You can play the area again to earn missing stars. Stars you earn stay yours.

Choose a new look

Open Stars & Style on the map. Ocean Blue opens at 3 stars, Sun Gold at 6, Purple Star at 9, and Crystal Light at 12. Choose Wear this to change the robot and runner. A style changes only their look. It does not change lives, time, moves or test scores.

Learn together

Ideas for students and teachers

Learning goals

Name things, rooms, places, lessons and jobs. Use this, that, these and those. Read clues about where things are. Follow steps and read times. Use two or more clues to choose a helpful answer.

A simple class plan

Before play: name things in your classroom. Read Word help together. During play: take turns and say why you chose an answer. After play: read the test results and practise the words you missed.

Try this sentence: "I choose a ruler because I need to draw a straight line." Add speaking and writing tasks in class. The game mainly helps students read and understand.

Credits & sources

Game creator: Suryo Agung Nugroho, S.Pd., SMP Negeri 1 Nglipar. The game uses DejaVu Sans Bold. Its licence is in FONT-LICENSE.txt. The home screen and certificate show the four education logos supplied with the project. Their original names and artwork stay unchanged.

Learning source: BSKAP Decision 046/H/KR/2025, English, Phase D. This game uses part of the reading goals. Product guide: Festival Biru Putih 2026, Educational Games, pages 7-12. Full source notes are in DOKUMENTASI-DESAIN.md.

Files in your game folder

index.html opens the game. content.js and question-bank.js hold the questions. The other JavaScript files run the game. certificate.js draws your certificate. Keep the assets folder. Panduan-Penggunaan.pdf is this guide. Demonstrasi.mp4 shows the game with scripted moves; it is not a classroom recording.
